PROFILE

With 2+ years of experience, I build modern web applications and interfaces, combining frontend development, API integration, and backend knowledge with a strong UX/UI perspective.

I work mainly with React, Next.js, and Laravel, contributing to web solutions where design, user experience, and code work together. I currently build full stack projects end to end with Next.js, Prisma, and MySQL, creating scalable solutions centered on users' needs.

EXPERIENCE

Frontend Developer · Founder

May 2025 — Present
ula studio · Independent design & development studio · [somosulastudio.com](#)

- Built the entire frontend of a medical studies platform for a clinic in Spain with Laravel, Livewire and Tailwind CSS, working with a backend developer and contributing to the database and server-side logic. In production since May 2025, with ongoing maintenance.
- Designed and built unda ([agendaunda.com](#)) full stack, a scheduling SaaS for professionals: own REST API, data modeling with Prisma and MySQL, session-based authentication and Zod validation. Live, in beta.
- Designed the multi-role UX/UI of a medical appointment platform and built its frontend with Next.js and TypeScript, consuming an external REST API with JWT auth in httpOnly cookies.
- Designed and built websites and landing pages for clients in Argentina and Spain with Next.js, Tailwind CSS and Figma.

PROJECTS

Medical Studies Management Platform

FRONTEND DEVELOPER – LARAVEL · LIVEWIRE · TAILWIND CSS

Optimized the flow for assigning, uploading, and reporting studies between the clinic and doctors.

Medical Appointment Management Platform

UX/UI & FRONTEND – NEXT.JS · FIGMA · REST API CONSUMPTION · JWT AUTH

Appointment system with multi-role logic for clinic, doctors, patients, and companies, with REST API integration for real-time data.

Conversion Landing Pages

NEXT.JS · FIGMA · TAILWIND CSS

Portfolios and booking sites for independent professionals, focused on identity and conversion.
