PROFILE

With 2+ years of experience, I build modern web applications and interfaces, combining frontend development, API integration, and backend knowledge with a strong UX/UI perspective.

I work mainly with React, Next.js, and Laravel, contributing to web solutions where design, user experience, and code work together. I'm eager to keep growing in software development and progressively expand my skills toward full stack development, building scalable solutions centered on users' needs.

EXPERIENCE

Web Developer & UX/UI Designer (Freelance)

March 2025 – Present

Self-employed

Design and development of end-to-end web applications for freelance projects, including a multi-role appointment management system with its own REST API, data modeling, and session-based authentication, plus a medical studies management portal and conversion-focused landing pages. Full UX/UI, frontend, and backend work with Next.js and Prisma.
